KEMSONS Weatherproof Telephone Set is good in dusty environment conditions and is specifically made to work with contemporary communication networks. It is created under the supervision of our qualified personnel utilizing cutting-edge technology while keeping in mind the established industrial standards. Before delivery to our esteemed customers, our given telephone set is examined by a quality controller for compliance with various quality standards. The KEMSONS Weatherproof Telephone Set is renowned for its distinctive qualities, including immaculate finishing, weather resistance, and trustworthy functioning. This outdoor field call station is ideal for industrial applications since it is rated IP66, made of high-impact material, and equipped with an innovative telephone circuit and dynamic microphone and receiver to increase the signal to noise ratio.

MODEL NO:
KTPLWPALSS
